

SPECIFIACTIONS

Item

Cup Volume

Dissolved hydrogen concentration

ORP

Power input

Water temperature

Dimension

description

1000~1800 ml max. 0.5~1.0±0.2ppm

-200~-600 mV DC 24 V-1A

not exceed 40 deegre 192W x 147D x 280H mm

Won a silver medal of IENA 2014 in Nuremberg

本產品荣獲 2014法國巴黎國際發明展 發明奖

Won a bronze medal of Paris invention show 2014

HYDROGEN ION RICH WATER

Hydrogen Ion Rich water(H2) which contains active Hydrogen Ions that produced by electrolysis during the "ionization" in our generator. Active hydrogen that act as powerful antioxidants in our body. The ion help to eliminate oxygen free radicals that contribute to the development of illness and ultimately are responsible for the aging process.

Our body takes in the H2 and convert it into hydrogen anions(H-) or commonly termed as ACTIVE HYDROGEN.

Active hydrogen is a powerful anti-oxidant as it is able to remove the active oxygen in our body that is known to be the cause of many type of chronic diseases.

WHY ACTIVE OXYGEN IS HARMFUL TO BODY?

Active oxygen refer to oxygen with a strong oxidizing action(oxidation). When oxidation happens in our body, it is bad health because it causes many type of damages to biomolecules and cellular structures that can result in the development of a variety of disease and it is also cause of aging.

HOW DOES HYDROGEN ION WATER FIGHT WITH OXYGEN?

To have better health, you will need more anti-oxidants to reduce the damaging effects of oxidation. Active hydrogen has been found to have the highest capability of removing active oxygen (Oxidation Reduction Potential , ORP). Hydrogen Ion rich water provides ORP at -300 mV to -600 mV .

FOR GERATER ABSORBABILITY!

Water from the Hydrogen Ion Rich Water generator has smaller molecular clusters than normal water. That means it move vitamins, minerals and other important nutrients across cell membranes more efficiently.

BENEFIT OF HYDROGEN ION RICH WATER.

There have been researches that have resulted in the benefits of drinking Hydrogen Ion water. The are listed on below:

- O Decreases the risk of colon cancer.
- O Detoxifies cells and whole body.
- O Helps to regulate body temperature.
- Improves memory in aged individuals.
- O Improves the body absorb nutrients and supplements better.
- O Increase blood circulation.
- O Helps to decrease fat and cholesterol in our body.
- Helps anti-aging.
